

TABLE OF CONTENTS

Vol. 51 No. 1 1991

JOANNA P. ANOSOVA / Strong Triple Interactions in the General Three-Body Problem	1
JUAN GETINO and JOSÉ M. FERRÁNDIZ / A Hamiltonian Theory for an Elastic Earth: Elastic Energy of Deformation	17
JUAN GETINO and JOSÉ M. FERRÁNDIZ / A Hamiltonian Theory for an Elastic Earth: First Order Analytical Integration	35
A. K. SHRIVASTAVA and DEBNARAYAN GARAIN / Effect of Perturbation on the Location of Libration Point in the Robe Restricted Problem of Three Bodies	67
E. PERDIOS and C. G. ZAGOURAS / Vertical Stability of Periodic Solutions Around the Triangular Equilibrium Points	75
D. J. SCHEERES and N. X. VINH / Linear Stability of a Self-Gravitating Ring	83
The Use of the "SPACEKAP" Style File for Delivering Manuscripts in LaTeX	105

Vol. 51 No. 2 1991

S. A. EL-HAFIEZ and M.E. FARES / The Motion of a Symmetric Gyrostat Around the Center of Mass in a Circular Orbit in the Presence of Viscoelastic Bars and Disc	107
B. CHAUVINEAU / The Generalized Hill Problem. Case of an External Field of Force Deriving from a Central Potential	119
ALESSANDRO MORBIDELLI and JACQUES HENRARD / Secular Resonances in the Asteroid Belt: Theoretical Perturbation Approach and the Problem of their Location	131
ALESSANDRO MORBIDELLI and JACQUES HENRARD / The Main Secular Resonances ν_6 , ν_5 and ν_{16} in the Asteroid Belt	169
The Use of the "SPACEKAP" Style File for Delivering Manuscripts in LaTeX	199

Vol. 51 No. 3 1991

ANDRÉ DEPRIT / The Lissajous Transformation: I. Basics	201
ANDRÉ DEPRIT and ANTONIO ELIPE / The Lissajous Transformation: II. Normalisation	227
BRUCE R. MILLER / The Lissajous Transformation: III. Parametric Bifurca- tions	251
ANDRÉ DEPRIT and CAROL A. WILLIAMS / The Lissajous Transformation: IV. Delaunay and Lissajous Variables	271
P. TSOTRAS and J. M. LONGUSKI / A Complex Analytic Solution for the Attitude Motion of a Near-Symmetric Rigid Body under Body-Fixed Torques	281
The Use of the "SPACEKAP" Style for Delivering Manuscripts in LaTeX	303

Vol. 51 No. 4 1991

GREGORY BUCK / The Collinear Central Configuration of n Equal Masses	305
ALBERT NIJENHUIS / Solving Kepler's Equation with High Efficiency and Accuracy	319
C. G. ZAGOURAS / Periodic Motion around the Triangular Equilibrium Points of the Photogravitational Restricted Problem of Three Bodies	331
E. PERDIOS, C. G. ZAGOURAS, and O. RAGOS / Three-Dimensional Bifurcations of Periodic Solutions around the Triangular Equilibrium Points of the Restricted Three-Body Problem	349
B. CHAUVINEAU / Generalized Hill's Problem: Some Cases of Complete Integrability	363
SEPPO MIKKOLA and JARMO HIETARINTA / A Numerical Investigation of the One-Dimensional Newtonian Three-Body Problem. III: Mass Depen- dence in the Stability of Motion	379
A. G. MAVRAGANIS / The Almost Constant-Speed Two-Body Problem with Resistance	395
The Use of the "SPACEKAP" Style File for Delivering Manuscripts in LaTeX	407
